

OFFICIAL BALLOT

ALL IN FAVOR OF THE **BEST** PRODUCTS.... **THE EYES HAVE IT!**

VOTE

- I call my favorite eye product, **Eyebright Anti-Puffiness Gelée**, 'My BLT Product.' It "Brightens, Lightens, and Tightens." When mixed with under eye corrector (or concealer) it becomes a colored eye gel. It is very easy to apply and stays on much longer with no visible lines forming. This "cocktail" works all day or night when used alone and keeps your eye area from getting puffy or dried out, without any greasiness. It is great for men, teenagers and travelers as it is package friendly for traveling. **Nancy Preefer, FL**
- Eyebright Intensive Eye Cream** is my favorite because it is a 3-in-1 product, treating puffiness, dark circles and fine lines in one step. This one seems to be just the right "weight." It absorbs completely and does not cause my makeup to crease. It works beautifully for just about any skin type. **Nancy English, MO**
- The **Eye Nourisher** is great for all skin types, highly emollient with brightening properties. Some of the key ingredients are Ubiquinone (CoQ-10) and three different forms of Vitamin C, including Mag C which is the most stable form of Vitamin C. Vitamin C is a powerful antioxidant that helps in the formation of collagen and skin brightening. It is my personal favorite. **Lorena Fierros, TX**
- Eye Nourisher!** There are so many things I love about this velvety eye crème. It rejuvenates and nourishes the eye area with magnesium ascorbyl phosphate and chitosan ascorbate, a stabilized form of vitamin C. Ubiquinone, also known as Coenzyme Q-10, replenishes damaged skin cells improving elasticity and texture to the eye area. A complex of licorice, green tea and cucumber bind moisture to the skin, giving it a plumper appearance, making fine lines less noticeable. Remember a picture is worth a thousand words, so don't forget to take before and after pictures. Use it night and day for best results. **Mary Leyva, TX**
- Line Filler** is the ultimate purse product. When going from the office to out of town, line filler gives you the instant action of plumping up fine lines while waking up tired eyes with its light reflecting qualities. It literally takes seconds to work. You can apply it over makeup and it penetrates rapidly to allow for a quick touch up. Everyone will be asking how you manage to look so refreshed after a long day at work. **Melissa Brenner, TX**

SO, WHAT ARE YOUR ANTI-AGING EYE CARE GOALS?

For loose skin, sagging skin, or damage under the eyes, it is best to apply a night eye cream formulated to repair those signs of aging and improve the skin tone around the eyes.

For morning, puffy eyes, bags, and dark circles, then a well-formulated eye serum might be the option that works for you.

If you're all about prevention, while promoting collagen growth and supple skin, than an eye cream could be applied first thing in the morning.

Most eye creams and/or serums are applied twice per day. On average, 30 days of usage yields measurable results.
